

Transport Layer Questions

Refer to the lecture and/or research on the web:

1. What is the role of transport layer protocols in computer networks?
2. How do transport layer protocols ensure reliable delivery of data packets?
3. What is the difference between TCP and UDP protocols?
4. Give an example of the sort of traffic suited to each protocol.
5. How do transport layer protocols handle lost or corrupted data packets?
6. Explain how a parity check works, give an example.
7. What is a CRC check and how is it used?
